Part II Mathematics and String Figures

4	W.W. Rouse Ball’s Mathematical Approach to String Figures	71
4.1	Ball’s Mathematical Recreations	71
4.2	Source Material	74
4.2.1	Haddon and His Successors Until 1911	74
4.2.2	Ball’s Introduction	76
4.3	First Descriptions of Oceanic Type String Figures	80
4.3.1	Sub-procedures	81
4.3.2	A Progressive Learning	84
4.4	String Figures as a System of Transformations	85
4.4.1	First Group: Diamonds	85
4.4.2	The “Many Stars” Group	87
4.4.3	<i>Lem</i> Group	94
4.4.4	<i>Navaho</i> Opening Group	98
4.4.5	Cat’s Cradle Group	100
4.4.6	Recapitulation	102
4.5	The 1920 Lecture	102
4.5.1	Introduction to the Lecture	102
4.5.2	Another Viewpoint on String Figure-Making	104
4.6	To Conclude	107
4.6.1	The Tenth and Eleventh Editions	107
4.6.2	String Figures as Recreational Mathematics	108
4.6.3	Mathematicians and String Figures	108
	References	109
5	Thomas Storer and the Concept of Heart-Sequence	111
5.1	Storer’s Interest in String Figures	111
5.2	Storer’s Systemology	112
5.2.1	Labelling the Functors	113
5.2.2	Crossing-Analysis and Linear-Sequence	114
5.2.3	Labelling the Objects	116
5.2.4	A Functional Language: The Calculus for String Figures	119
5.2.5	String Figure Process as a Single Formula: The Example of <i>Niu</i>	124
5.2.6	Heart-Sequence of a String Figure	126
5.2.7	Before Going Further	131

5.3 Some Questions Raised by the Concept of Heart-Sequence 134

 5.3.1 Reconstructing a String Figure Algorithm
 from Its Heart-Sequence 134

 5.3.2 Heart-Sequence and Symmetry 140

5.4 Before Going Further 148

References 148

Part III Analysing String Figure Algorithms

6 Heart-Sequences and “Look-Alike” String Figures 151

6.1 *Pu kava* from the Marquesas Islands 151

 6.1.1 The Procedure *Pu kava* and Its Heart-Sequence 151

 6.1.2 Comparison with *Niu* 154

6.2 Estrellas from the Chaco, Paraguay 156

 6.2.1 *Jasytata* from the Chaco, Paraguay 156

 6.2.2 Estrella, from the Chaco 160

6.3 *Kapiwa* from the Trobriand Islands 163

 6.3.1 The Procedure *Kapiwa* and Its Heart-Sequence 163

 6.3.2 Comparison of *Kapiwa* and *Jasytata* 166

6.4 *Na tifai* from the Tuamotus 169

 6.4.1 The Beginning of *Na tifai* 169

 6.4.2 From $Conf(A)$ to $Conf(\underline{O}A)$ 172

 6.4.3 From $Conf(\underline{O}A)$ to $Conf(A)$ 173

 6.4.4 Starting from $Conf(B)$ 173

 6.4.5 Heart-Sequence of *Na tifai* 174

 6.4.6 Classification in Group I and II 180

 6.4.7 Before Going Further 182

References 184

7 Understanding Transformations 185

7.1 Deconstruction 185

 7.1.1 From “Stars” to “Moon” Versus “Egg” 185

 7.1.2 Another Example 195

7.2 From *Salibu* to 4-Lozenges 198

 7.2.1 Heart-Sequence of *Salibu* 198

 7.2.2 Transformation 201

 7.2.3 Heart-Sequence of *Kala tugebi navalulu* 204

 7.2.4 Understanding the Phenomenon 206

7.3 Motifs and Heart-Sequences 212

 7.3.1 Double Lozenges 213

 7.3.2 Caterpillar 215

 7.3.3 Combination: Concatenation 217

7.4 Before Going Further 218

References 219

Part IV String Figures in the Field

8 Cultural and Cognitive Aspects of String Figure-Making

in Two Different Societies	223
8.1 The Right Place to Go	223
8.1.1 Trobriand Islands, Papua New Guinea	223
8.1.2 Chaco, Paraguay	224
8.2 General Methodology	225
8.2.1 Working Sessions	225
8.2.2 Recording String Figures	226
8.3 Insight into the Trobriand Islanders' Society	227
8.3.1 Getting to the Village Oluvilei	227
8.3.2 First Steps in the Village	228
8.3.3 Gardening and Marking Time	230
8.3.4 Going Around Oluvilei	231
8.3.5 Kinship System, Districts and Cultural Areas	233
8.3.6 Kula Trade	239
8.4 String Figures-Making in Oluvilei	241
8.4.1 On the Etymology of the Vernacular Name of String Figure-Making	241
8.4.2 Plaiting the String for Performing <i>Kaninikula</i>	241
8.4.3 Collecting String Figures: Meeting the "Experts"	243
8.4.4 Some Cultural and Cognitive Aspects of <i>Kaninikula</i>	244
8.4.5 Expressing Knowledge Through String Figures	247
8.4.6 <i>Kaninikula</i> as a Mathematical Activity	256
8.5 Fieldwork in the Chaco, Paraguay	257
8.5.1 The Mission Santa Teresita	257
8.5.2 The <i>Tukumbu</i> Corpus	259
8.5.3 Before Going Further	266
References	266

9 Comparison of the Trobriander and Guarani-Ñandeva

String Figure Corpora	269
9.1 Elementary Operations and Short Sub-procedures	269
9.1.1 Inventory: Description and Vernacular Terms	269
9.1.2 Statistical Comparison	276
9.2 Description and Comparative Analysis of the Openings	283
9.2.1 Openings of the <i>Kaninikula</i>	284
9.2.2 Openings of the <i>Tukumbu</i>	291
9.2.3 Comparison	297
9.3 Passages from One Normal Position to Another	301
9.3.1 Trobriands Corpus	302
9.3.2 Chaco Corpus	317
9.3.3 Comparison	323

9.4	The Mathematical Activity of Creating String Figures	329
9.4.1	Iterative Sub-procedures	329
9.4.2	Variations on a String Figure Algorithm	334
9.4.3	Different Paths to Get the Same Pattern	340
9.4.4	Getting the Same “Motif”	341
9.4.5	Obtaining Same Intermediate Figures	342
9.4.6	Different Methods to Make the Same Complex Crossing	342
9.4.7	Similar String Figures	345
	References	351
10	Conclusion	353
10.1	Mathematical Aspects of String Figure-Making	353
10.1.1	A Mathematical Practice	353
10.1.2	Formalization of “String Figure Algorithms”	354
10.2	Comparison Trobriands/Chaco: Main Outcomes	357
10.3	The Question of the Wide Circulation of String Figures	361
	References	367
Annexes	369
Annex I:	Classification of Double-Sided Lozenge String Figures	369
	Oceania	369
	Double-Sided Lozenge String Figures from Other	
	Geographical Areas	370
Annex II:	Classification of the Names of String Figures	370
	Trobriands Corpus	370
	Chaco Corpus	372
Annex III:	The Procedure <i>Salibu</i> Throughout Oceania	373
Annex IV:	Classification of the Openings	376
	Trobriands Corpus	376
	Chaco Corpus	379
Terminology:	Summary Tables	383
	Haddon & Rivers’ Nomenclature	383
	Storer’s Systemology	383
